

1200mm x 900mm & 900mm x 900mm

The Deep Shower Trays are ideal for those who prefer a shower curtain instead of a glass shower screen. With an inside depth of 125mm these trays can be used anywhere a normal tray can be used. They also come with a 35mm tiling flange on three sides to make installation easier and ensure a good watertight seal. Freestanding bases are standard with these trays. The 900mm x 900mm Tray can also be fitted with the Elisha Walls to create a full fibreglass shower cubicle that can be dismantled to fit through a standard doorway.
